

NORA Tank Certification

One of the NORA Gold Certification modules

This full day session is based on the NORA publication “Heating Oil Storage Tanks, Guide for Quality Installation and Service” and NFPA 31 – the “Standard for the Installation of Oil Burning Equipment.”

Topics include:

- **Why tanks fail and how to extend their life spans**
- **Codes and regulations**
- **Installation considerations**
- **Installation procedures**
- **Oil lines**
- **Tank inspection and maintenance procedures**
- **Recent changes to the national codes**

Technicians who successfully complete the program earn 6 NORA CEU’s.

To achieve Gold status, technicians are required to have a NORA Silver certification, five years of experience working on Oilheat systems and must successfully complete four of the eight gold module classes.
